## **DETAILED ACTION**

## Information Disclosure Statement

The Information Disclosure Statement submitted September 22<sup>nd</sup> 2003, has been considered, and a copy of the Statement including the Examiners notation is attached for the Applicant's records.

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1-3, 5, 8-9, 12-13, 18-19, and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Bennett (US 6,419,579).

Claims 1-2, 8, and 18: Bennett teaches a gaming machine comprising:

a display module for displaying a changing display including the changing of multiple symbols (reel spin feature) at the start of a game (Figure 1, Col 1:60-67);

a plurality of symbols including a wild symbol (Fig 3, Col 2:12-21);

multiple win lines comprising a subset of the plurality of symbols (Col 3:25-35);

a static display of the plurality symbols on multiple areas of the display module (Figure 1, Col 1:60-67);

Art Unit: 3714

an evaluation module for identifying winning arrangements of symbols and wild symbols on the display such that the wild symbol establishes multiple predefined wins (Figure 1, Col 4:29-5:25);

Claim 3, 5,9, 12-13, 19, and 21: Bennett teaches the sequential displaying of multiple winning arrangements with a changing wild symbol, in which multiple wins are established (Col 4:29-5:25).

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims **4**, **6**, **10**, **11**, **20**, and **22** are rejected under 35 U.S.C. 103(a) as being unpatentable over Bennett (US 6,419,579) as applied to at least claims **1-3** above, and further in view of Kaminkow (US 6,837,790).

Art Unit: 3714

Though teaching teaches the gaming device as set forth above, Bennett is silent regarding the incorporation of a vibration feature such that a display mechanism vibrates when a multiple win feature including a common wild symbol occurs. In a related invention however, Kaminkow teaches the inclusion of a vibration feature in an electronic wager game wherein the feature is further taught by Kaminkow as being readily adaptable to a plurality game trigger events (*Kaminkow* Col 2:16-37). It would have been obvious to one of ordinary skill in the art at the time of invention to have incorporated the features of the vibration feature as taught by Kaminkow into the invention of Bennett in order to provide the player with additional entertainment and excitement as taught by Kaminkow (*Kaminkow* Col 2:54-60).

Claims **7**, **14-15**, **17**, and **23** are rejected under 35 U.S.C. 103(a) as being unpatentable over Bennett (US 6,419,579) as applied to at least claims **1-3** above, and further in view of Hamano (US 5,205,555).

Though teaching teaches the gaming device as set forth above, Bennett is silent regarding the incorporation of multiplier that are predetermined based on the symbol combination. In a related invention however, Hamano teaches the inclusion of predefined multipliers in a multi-reel slot machine (Figures 15-16, Col 1:38-2:39) to make a slot machine game more entertaining and a more exciting experience. It would have been obvious to one of ordinary skill in the art at the time of invention to have incorporated the predefined multiplier of Hamano into the invention of Bennett in order

Art Unit: 3714

to make a slot machine game more entertaining and a more exciting experience as taught by Hamano.

Claim **16** is rejected under 35 U.S.C. 103(a) as being unpatentable over Bennett (US 6,419,579) in view of Kaminkow (US 6,837,790) as applied to at least claim **4** above, and further in view of Hamano (US 5,205,555).

Though teaching teaches the gaming device as set forth above, the invention of Bennett/Kaminkow is silent regarding the incorporation of multiplier that are predetermined based on the symbol combination. In a related invention however, Hamano teaches the inclusion of predefined multipliers in a multi-reel slot machine (Figures 15-16, Col 1:38-2:39) to make a slot machine game more entertaining and a more exciting experience. It would have been obvious to one of ordinary skill in the art at the time of invention to have incorporated the predefined multiplier of Hamano into the invention of Bennett/Kaminkow in order to make a slot machine game more entertaining and a more exciting experience as taught by Hamano.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Mosser whose telephone number is (571)-272-4451. The examiner can normally be reached on 8:30-4:30 Monday-Thursday.

Art Unit: 3714
